

Adham Soliman Abbas Soliman

Java Backend Developer

✉ adhamsoliman12199@gmail.com ☎ +201003197262 📍 6th of October

🛡 Completed Military Service (December 2022) 🔗 [linkedin.com/in/adham-soliman9](https://www.linkedin.com/in/adham-soliman9)

PROFILE

Experienced Java Backend Developer skilled in Spring Boot and databases, focused on building efficient and secure systems with clean, maintainable code. Adept at optimizing application performance and ensuring high scalability. Passionate about writing reliable code and continuously improving backend processes to meet business needs.

EDUCATION

B.Sc. in Communication and Electronics Engineering, , Faculty of Engineering, Suez Canal University ,(CGPA 2.79 / Very Good) Coursework: Communication systems, Communication Theory, Information Theory, Satellite communication, Networks and Data Communication. Graduation Project: Smart Campus: Designed and implemented smart solutions for daily tasks in student's life within campus (smart gates based on ALPR deep learning model, smart attendance based on face recognition deep learning model, smart parking based on image processing algorithms, mobile application provides user interface to students, employees and professors).	09/2016 – 07/2021
High School Diploma, Egyptian GCSE, Amoun Private School, (96.52%)	09/2013 – 07/2016

EXPERIENCE

Java Backend Developer, NTG Clarity Company • Ability to write clean, efficient, and maintainable code in Java. • Assisted in troubleshooting and debugging code issues to ensure the stability of existing applications. • Implemented RESTful APIs to facilitate communication between different components of the system. • Write efficient, reusable, and scalable code. • Write optimized SQL queries and interact with databases using ORM frameworks. • Work closely with the team leader in task estimation and planning	12/2024 – present Giza, Egypt
Full Stack Developer(Trainee), NTG Clarity Company • Knowledge of Angular & SCSS. • Knowledge of Spring concepts such as dependency injection, MVC architecture, and aspect-oriented programming. • Experience in working with both MySQL and PostgreSQL databases. • Experience in implementing RESTful APIs for communication between the client and server.	09/2024 – 12/2024
Software Engineer, Sky Humans Company InMoov Robot Development: • Microcontroller Programming: Developed the control system using AVR ATmega32 and ROS to precisely control all robot parts. • Voice Assistant Integration: Created a Python-based voice assistant for verbal interaction, incorporating speech recognition and command execution. • Software-Hardware Integration: Achieved seamless communication between the microcontroller and the voice assistant, ensuring reliability and performance.	01/2024 – 08/2024 Giza, Egypt

SKILLS

Programing Languages

- Java (OOps Concept, Collection Framework, Web Services)
- JavaScript
- SQL
- HTML/CSS

Tools and IDEs

- IntelliJ IDEA , Visual Studio Code,Git

Databases

- PostgreSQL
- MySQL
- ORCALE

Angular Framework

- Reactive forms
- Template forms
- HttpClient
- Route Guards

Spring Framework

- Data JPA
- Spring REST-API
- Hibernate
- Spring Boot
- Spring Security
- Spring Cloud

PROJECTS

STC NETCONT-Network Control,, NTG Clarity Company

NETCONT is a backend system in Telecom STC KSA company.

- controlling the network by barring a specific list of sites or unbarring a specific list of sites. NETCONT will receive the list of sites from the GIS system and will control the network through integration with different NMSs.

VSM (Vodafone Service Management),, NTG Clarity Company

- Developed and maintained a service management application for monitoring users and Vodafone-provided internet devices.
- Developed RESTful APIs to enable seamless communication between the backend and frontend.
- Optimized database queries to ensure fast and reliable data retrieval.
- Provided ongoing support and troubleshooting to maintain system stability and enhance user experience.

Spring Boot Donation Website, NTG Clarity Company

- Built a platform similar to e-commerce systems but without payment integration using Java and Spring Boot.
- Developed features such as user registration, item listing, and cart management.
- Integrated RESTful APIs for seamless frontend-backend communication.
- Utilized PostgreSQL for database management and optimized queries for performance.

Spring Boot To-Do List Application, NTG Academy

- Developed a Spring Boot To-Do list application with full CRUD operations (Create, Read, Update, Delete) for task management.
- Utilized Spring Data JPA for database interaction and implemented RESTful APIs for task management.
- Configured H2/PostgreSQL for data storage and ensured data integrity with validation and error handling.
- Followed best practices for application design to ensure maintainability and scalability.

Smart Campus Mobile App, Connect with the real time parking system as it shows the empty & busy parking spots read from the system to make it easier for the users to find the empty spot quickly. help the interaction between the staff and student much easier through recording the attendance on the application through the face recognition system instead of calling each student by name which takes a long time, although it will show all the classwork degrees, and the professor can although upload lectures' PDFs. (Android Studio IDE, Java, Firebase and Adobe XD).

ORGANIZATIONS

IEEE Suez Canal University Student Branch, Vice Chairman	09/2019 – 09/2020
IEEE Suez Canal University Student Branch, Technical Member	06/2017 – 09/2018
SCU Racing Team, Software Engineer	07/2017 – 08/2018
